25X1

1. No planes were seen at the Brandenburg-Arado (N 53/Z 13) airfield between 11 a.m. and 1 p.m. on 2 August 1950. * The hangars were closed. The radio station was at the same site as on 3 July 1950. **
 2. Eight German surveyors and laborers worked at the eastern edge of the landing field and in the northeastern section of the airfield. *** About 60 to 80 laborers did repair work in and outside the quartering building on the eastern edge of the field, not far from the Brandenburg-Neuendorf (N 53/Z 13) road. ** No construction work was being done on other buildings or hangars.
 3. There were no serviceable lighting facilities. The former lighting installation was destroyed.
- * ☐ Comment. The occupation of the field has not changed since 3 July 1950.
- ** ☐ Comment. The radio station and the repair work on a quartering building were previously reported by the same source. ☐ The information has not been confirmed by other sources.
- *** ☐ Comment. Surveying at the northeastern edge of the field is reported for the first time. Since the landing field is bordered by buildings on the northeast it cannot be extended in that direction.
